Description

Product description

The popular outdoor light string, String Lite ®, is available in lengths of 4.5m, 12m and 20m. String Lite ® features points of light fixed directly to the light cable. A string is generally made up of multiple segments. By means of the design protected QuickFix™ system, 8 to 20 segments may be connected together, according to the exact product chosen. The individual segments shine with 20 to 160 points of LED light according to product. Each segment can be individually replaced.

Decoration solutions

String Lites® are the solution that shines, thanks to the high-intensity light they give off from myriad tiny points. Depending on the decoration object, they give an atmospheric and yet fun impression. String Lites® are particularly easy to use thanks to their flexibility which makes them a versatile solution. String Lites® can easily be wrapped around trees and are perfectly suited for the decoration of large areas and facades, as decoration over and across streets, for the creation of motifs, and as outline decoration, e.g. of gables or balconies. The LEDs are available in various colours.
